

SIME How To's

Here are some hints for special races using SIME.

Enduro events

You may use SIME for special races where not all splits are used for total results.

- If race have 5 „timed stages“ (Stage 1, Stage 2, Stage 3, Stage 4 and Stage 5)
- You need following SPORTident stations: START, 11, 20, 21, 30, 31, 40, 41, 50, FINISH. Actual numbers are not important. So for **stage one** we have SI stations START, 11; for **Stage 2** cp20 and cp21; for **Stage 3** cp30, cp31; for **Stage 4** cp40, cp41; for last stage 50 and FINISH.
- SIME course definition is like this:

```
ENDURO=11,20,21,30,31,40,41,50=10.5  
km=2000,500,2200,300,3500,400,1500,250,1250=Stage 1,-,Stage 2,-,Stage 3,-  
,Stage 4,-,Stage5
```

- In SIME setup page we need to define splits what will be excluded from total time. So in Extras panel into „Subtract split-times from control“ we enter following control numbers:

```
20,30,40,50
```

There are also times between stages in split times report, but total time have only times from stages.
